2017 NOSHA SAFETY CONFERENCE: NEXT LEVEL SAFETY

GUEST SPEAKERS

BOB MCCALL
KEYNOTE SPEAKER

From Pittsburgh, PA, Bob attended Tuskegee University and majored in Building Construction Technology. He worked ten years with Bechtel Power Corporations in construction, maintenance and operations of nuclear power plants, as well as eight years for Alliant Energy in Iowa at the Duane Arnold Energy Center. Bob became the first African American Plant Manager when he was hired by Progress Energy to serve the Lee Plant in Goldsboro, NC. After 33 years in the industry, Bob retired from Duke Energy as General Manager of Fleet Services.

Currently, Bob is president of Inspire High Performance, LLC, where he gets to follow his true passion of helping companies and organizations build a culture of high performance where all can work at their top potential every day, thus preventing injuries, saving lives, recognizing errors, and improving processes. He is a prolific speaker and is author of the projected best-selling book Zero Accidents and Injuries: Are You Willing to Pay the Price? Bob's motto is, "Make a difference everywhere you go."

TRACY CAMERON
RIVERVIEW HEALTH

Tracy Cameron, OTR/L, COHC, CEAS II, is an occupational therapist who has worked in Occupational Health for over 20 years. In her role as Occupational Health Services Coordinator for RiverView Health, Cameron works directly with area companies to provide education, on-site ergonomic consultation, work related testing and return to work programming for injured workers, as well as coordinate Occupational Health services. She is certified to provide Ergonomic Evaluation (office and industry), Functional Capacity Evaluation testing, Functional Job Analysis, Pre-Employment testing, Return to Work testing and programming, OSHA Hearing Screening, and Respirator Fit testing. Tracy is a native of Fisher, MN where she resides on the family farm with her husband.

MAURIZIO DELCARO
DELCARO SAFETY & ENVIRONMENTAL

Maurizio Delcaro is a safety and environmental consultant, an adjunct instructor at Embry-Riddle Aeronautical University, and serves on the Content Advisory Board for Safeopedia. His one absolute belief in the world of EHS is that a commitment to operational efficiency at all levels is the single greatest factor in maximizing safety and productivity. His board certifications include the CSP, CET, OHST, and CHST with the Board of Certified Safety Professionals (BCSP) and CEHT with the National Environmental Health Association (NEHA). He is a long-time volunteer with service on directorships, committees, and boards, and is a facilitator and speaker at conferences and conventions.

PROGRAM DESCRIPTION

BOB MCCALL

Getting to the Next Level of Safety Performance

Bob McCall's career spans over 33 years in the Utility industry. Join him as he shares four proven and battle tested steps to improving your team's performance. Bob believes the power is not in safety rules, but in people who are willing to demonstrate passion, commitment and leadership and that engagement from the entire team will create a winning culture of top performers. Bob will share how changing expectations for team culture, team members, getting rid of those who don't measure up and hiring winners will enable any organization to improve their performance thus raising the bar to the next level. Come prepared to be personally challenged to look within yourself and ask the questions... Have I done all I can? Is there one more thing I can do to help my team be safe?

Now is the time to act, don't wait till an unfortunate accident happens and have to live with regrets.

TRACY CAMERON

RiverView Health - The Fun and Games of Ergonomics

Let's inject life and interaction into your ergonomic trainings and programs. Let's face it, ergonomic training can be boring and employees may not retain the information from year to year. So let's not just learn about basic ergonomics, let's learn how to engage our employees by infusing our trainings with humor and active participation to get them absorbing the information about safe work postures and practices. Volunteers may be needed, so be ready to be part of the fun and learn some new ergonomic tricks.

MAURIZIO DELCARO

OSHA Update and Walkthrough of Electronic Reporting System

Maurizio will address some OSHA standard areas that have recently changed and also provide an overview of how to know what other changes OSHA is considering down the road ahead. After a revision effort that lasted 40+ years, OSHA reorganized its fall protection standards in a more logical manner, harmonized treatment between general industry and construction workplaces, and eliminated redundant and unnecessary requirements; this is a very good thing! Year-2016 OSHA record keeping data is the first batch that some (but not all) establishments will be required to submit electronically; see OSHA's online mechanism in action! And, did you know OSHA currently has 14 rules in various stages of the rulemaking process? Maurizio will show you an easy way to be 100% informed.
